

I LOVE WOOD

For the love of wood

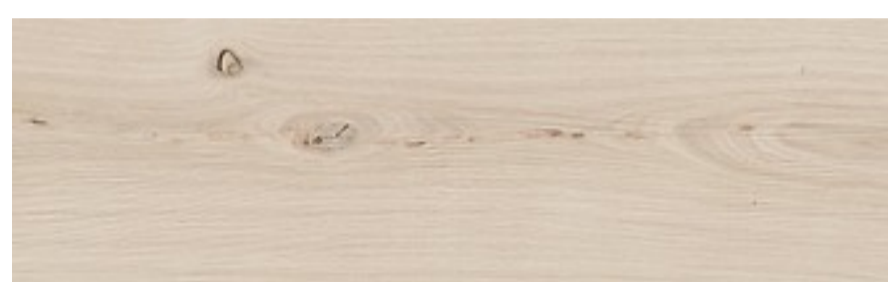

Contemporary European indoor design trends have been seeking inspiration in the natural world for years, and its peak is now. Cersanit has created I Love Wood with all the beauty and uniqueness of timber and the durability of robust vitrified tiles. Each tile comes with a unique grain of wood to provide an imitation of wooden planks on the floor. And, with the different wood species available, I Love Wood is the most diverse collection in Cersanit's portfolio. The light tones are a great match for Scandinavian minimalism, the darker and fuller tones emulate old English indoor design themes while the cool and smart shades of brown are perfect for those indoor designs which evoke a sense of order.
