Anti-spatter

Super Pistolenspray & Super Pistolenspray NF

The classical Anti-Spatter-Spray

ABICOR BINZEL Anti-Spatter-Spray is a special silicon-free formula developed on the basis of environmentally-friendly, solvent-free natural special oils that are not harmful to health, and additives that do not have to be specifically labelled.

The Anti-Spatter-Spray has been successfully used in all sectors of the metalworking industry and is in demand daily in very different areas of application.

- Silicon-free
- Environmentally friendly raw materials as a basis
- Solvent-free

Pos.	Description	Part-No.
1	Anti-Spatter-Spray, 400 ml; 12 pcs.; languages: DE/EN/FR/NL/SV/DA/PL/IT	192.0071
1	Anti-Spatter-Spray, 400 ml; 12 pcs.; languages: CS/SK/PL/HU/HR/SL/SR/EN	192.0107
1	Anti-Spatter-Spray, 400 ml; 12 pcs.; languages: RU/UK/LT/LV/ET/BG/RO	192.0213.1
1	Anti-Spatter-Spray, 400 ml; 12 pcs.; languages: EN/ZH/ES/EL/PT/NO/TR	192.0214.1

Non-flammable anti-spatter-spray for torches und workstations

The newly developed Super Pistolenspray NF is a non-flammable anti-spatter agent for torch and work-piece.

It can be used anywhere, especially where the use of flammable sprays is not possible or even prohibited, such as: in closed rooms, in container and shipbuilding.

Based on an aqueous emulsion of vegetable oils, the new Super Pistolenspray NF contains no hazardous substances and is therefore not subject to any separate safety regulations, neither during transport or storage nor during of use.

Thanks to its neutral behavior towards the welding process and thanks to its corrosion inhibitors, it can also be applied to the gas nozzle of the torch and the workpiece for protection against spatters and corrosion.

- Non flammable according ABICOR BINZEL NF standard
- Silicone-free, wax-free and water-soluble
- Neutral behavior towards the welding process
- Corrosion inhibitors protect equipment and surfaces
- Aspraying behavior optimized for workpiece and gas nozzle
- More usable release agent with the same can size

Pos.	Description	Part-No.
2	Super Pistolenspray NF*, 400 ml, 12 pcs., languages: DE/EN/FR/IT/ES/NL/PT/PL/CS/RU/UK/ZH	192.0315.1

*When used for welding aluminium or special alloys, a welding test should always be carried out beforehand.

Anti-spatter Düsofix

Nozzle protection paste

Düsofix is a spatter protection paste for gas nozzles. Biodegradable, special labeling not required, silicon-free. The metal can enables the hot gas nozzle to be dipped safely into the Düsofix – even directly after the welding process. The spatter adhesion is reduced by the protective film.

- Silicon-free
- Special labelling not required
- Can also be used on hot gas nozzles

Pos.	Description	Part-No.
3	Düsofix, 300 g; 12 pcs.; languages: DE/EN/FR	192.0058
3	Düsofix, 300 g; 12 pcs.; languages: CS/SK/PL/RO/BG	192.D032
3	Düsofix, 300 g; 12 pcs.; languages: RU/HU/LT/LV/ET	192.D033
3	Düsofix, 300 g; 12 pcs.; languages: ES/IT/PT/EL/TR	192.0224.1

Anti-spatter Ceramic Spray

Premium anti-spatter-spray for torches

ABICOR BINZEL Ceramic Spray is resistant to high temperatures and provides long-term protection from welding spatter adhesions on gas nozzle and contact tips, and on all welding process fixtures. ABICOR BINZEL Ceramic Spray increases system availability and lowers ongoing maintenance costs. It is also perfectly suitable for automated applications with long welding processes.

After spraying, a white ceramic protective film is formed that is resistant to high temperatures. Thanks to the extremely short drying time of approx. 5 seconds, the welding process can be started immediately.

- Silicone-free
- Very high ceramic content – wide coverage
- Lowers ongoing maintenance costs
- Increases system availability
- Excellent coating adhesion
- High abrasion resistance
- Very short drying time (approx. 5 seconds)
- For all MIG/MAG torches
- For all processes

ABICOR BINZEL Ceramic Spray

Pos.	Description	Part-No.
1	Ceramic Spray, 400 ml; 12 pcs.; languages: DE/EN/FR/NL/ES/PT/IT/SV	192.0228.1
1	Ceramic Spray, 400 ml; 12 pcs.; languages: RU/CS/SK/PL/LT/LV/ET/EN	192.0229.1
1	Ceramic Spray, 400 ml; 12 pcs.; languages: EN/FI/SV/NO/DA/TR/ZH/EL	192.0242.1

Ceramic Coating Cap

The Ceramic Coating Cap was developed specially for ABICOR BINZEL Ceramic Spray. The contact tip as well as the tip of the gas nozzle and its interior can be optimally protected in a few seconds from adhering welding spatter with the Ceramic Coating Cap.

- Cost savings through lower consumption
- Protects the welder and the environment
- Time savings through better handling
- Optimum wetting of the gas nozzle
- Can be reused several times

Pos.	Description	Part-No.
2	Ceramic Coating Cap; 10 pcs.	192.0256.10

Anti-spatter

ABIBLUE NF

Welding spatter gets the blues!

ABIBLUE NF does away with welding spatter adhesions on the workpiece in a particularly effective way and thus saves time and money. It contains a blue colour indicator that shows the welder immediately whether the workpiece is covered with a separating agent – naturally without influencing the welding process.

Usable for all relevant welding methods, as well as for laser and plasma cutting. This simplifies handling in larger operations with different welding and cutting processes.

Safety for subsequent coating/painting/galvanising was ensured in cooperation with an independent testing institution. In addition, there is no increased hydrogen input with aluminium welding – another quality feature of ABIBLUE NF.

This spatter protection variant is particularly environmentally friendly through the use of sustainable raw materials.

The advantages of ABIBLUE NF

- Non-flammable – satisfies the ABICOR BINZEL NF standard
- Special labeling not required in accordance with GHS/CLP
- Easily biodegradable
- Can be washed off with water
- Silicon-free
- Colour indicator – optimal detection of workpiece wetting
- Suitable for welding and laser cutting applications
- Capability of being welded over confirmed by an independent testing institution
- No adverse effects with subsequent coating/painting/galvanising if standard pre-treatment methods are complied with
- Frost-resistant

„ABICOR BINZEL® NF-Standard“

Products from ABICOR BINZEL that have the abbreviation „NF“ (non-flammable) in their name have passed practical tests developed by ABICOR BINZEL especially for welding technology.

The standard defined by ABICOR BINZEL for NF products goes further than the provisions of the GHS and of the CLP Regulation on the classification of the flammability of an NF product and covers a broad range of standard combinations of active shielding gases,

extremely different workpieces and different welding processes.

Only products that have passed all the tests without igniting may show the ABICOR BINZEL NF designation. In addition to the „NF“ in the name, products are also marked with a stamp.

The ABICOR BINZEL NF standard provides more safety for welders and companies.

ABIBLUE NF
anti-spatter-
emulsion

Pos.	Description	Part-No.
1	ABIBLUE NF anti-spatter-emulsion, 5 litre canister; languages: DE/EN/FR/IT/RU/UK	192.0238.1
2	ABIBLUE NF anti-spatter-emulsion, 10 litre canister; languages: DE/EN/FR/IT/RU/UK	192.0239.1
3	ABIBLUE NF anti-spatter-emulsion, 20 litre canister; languages: DE/EN/FR/IT/RU/UK	192.0240.1
not ill.	ABIBLUE NF anti-spatter-emulsion, 200 litre barrel*; languages: DE/EN/FR/IT/RU/UK	192.0241.1
4	Outlet tap for 20 litre canister; 5 pcs.	192.0191.5

* Can be used for at least 6 months without remixing if stored and transported frost-free.

In order to guarantee maximum durability, the barrels are not in stock, but the delivery time is only approx. 2 weeks.

Anti-spatter

ABIBLUE NF

ABIBLUE NF spray bottles

The sprays have spray heads specially designed for ABIBLUE NF and thus ensure an optimum spraying pattern. The spray head can be set to the required spraying pattern before use, and the workpiece can be evenly sprayed and wetted. Suitable for use with ABIBLUE NF anti-spatter-emulsion.

The metal spray bottle is our robust solution for keeping ABIBLUE NF close to the process. Thanks to its solid metal body, it is insusceptible to heat and welding spatter.

A plastic spray bottle is available as an alternative to the metal spray bottle. This does not require pressure compensation and is thus leak proof.

Pos.	Description	Part-No.
1	Metal spray bottle, without contents, 400 ml; 12 pcs.	192.0163
2	Hand spray pump for metal spray bottle; 1 pc.	192.0164
3	Plastic spray bottle, without contents, 500 ml; 15 pcs.	192.0254.15

„ABICOR BINZEL® NF-Standard“

Products from ABICOR BINZEL that have the abbreviation „NF“ (non-flammable) in their name have passed practical tests developed by ABICOR BINZEL especially for welding technology.

The standard defined by ABICOR BINZEL for NF products goes further than the provisions of the GHS and of the CLP Regulation on the classification of the flammability of an NF product and covers a broad range of standard combinations of active shielding gases,

extremely different workpieces and different welding processes.

Only products that have passed all the tests without igniting may show the ABICOR BINZEL NF designation. In addition to the „NF“ in the name, products are also marked with a stamp.

Coolant liquids

Conductivity tester

Primo 5

Low conductivity of the coolant in liquid cooled welding and cutting equipment has been shown to increase the lifetime of the hose package, torch and cooling unit and should therefore be checked at regular intervals.

The new conductivity tester Primo 5 is ideally suited for checking the conductivity and, thanks to its compact design, allows a faster and less complicated measurement than its predecessor.

Its long, rugged probe requires low maintenance while still ensuring accurate measurement. The measured value is easy to read via the large display. Temperature compensation is automatic via integrated temperature sensor and the calibration is done automatically via a special calibration liquid.

Pos.	Description	Part-No.
4	Conductivity tester Primo 5	514.0062.1
	Calibration liquid bottle 230 ml	514.0311.1

Recommended maximum conductivity:

MIG/MAG	350 $\mu\text{S}/\text{cm}$
TIG	250 $\mu\text{S}/\text{cm}$
Plasma	30 $\mu\text{S}/\text{cm}^*$

*applies to products from ABICOR BINZEL, for competitor products, the manufacturer's specifications are to be observed!

Technical data:

Range:	0 to 1999 $\mu\text{S}/\text{cm}$
Resolution:	1 $\mu\text{S}/\text{cm}$
Accuracy:	$\pm 2\%$ of the display
Calibration:	Automatic with calibration liquid (1413 $\mu\text{S}/\text{cm}$)
Temperature compensation:	Automatic between 0 and 50°C
Battery type/lifetime:	2 x 1.5 V, approx. 200 hours of continuous use
Automatic shutdown:	After 5 min.
Dimension:	180 x 50 x 25 mm
Weight:	50 g

Coolant liquids

BTC & BTC-NF

Coolants for all welding and cutting systems

Liquid cooled torches require special coolants. These should have very good cooling properties, low electrical conductivity and in addition good storage properties. ABICOR BINZEL BTC coolants satisfy these requirements reliably, ensure optimal cooling of liquid cooled welding and cutting torches and thus provide perfect protection for the complete cooling system.

- Optimal cooling of torches
- Long life in the cooling system
- Prevents a rapid increase in the electrical conductivity – electrical corrosion on metal parts is considerably reduced
- The complete cooling system is protected from blockages and consequential damage
- Suitable for all welding and cutting systems

BTC-15

- Very low conductivity value of < 4µS/cm.
- Frost-proof up to -12° C
- Silicone-free
- pH value: 6

Pos.	Description	Part-No.
1	BTC-15, 5 litre canister; languages: DE/EN/FR/ES/CS/SK/PL/RU	192.0110
2	BTC-15, 20 litre canister; languages: DE/EN/FR/ES/CS/SK/PL/RU	192.0111
3	Outlet tap for 20 litre canister; 5 pcs.	192.0191.5
not ill.	BTC-15, 200 litre barrel; languages: DE/EN/FR/CS/PL/RU	192.0112
4	Spigot for 200 litre barrels; 1 pc.	192.0109

Welding cable connector system

ABIPLUG

Plug and weld! ABIPLUG – the reliable connection.

The new range of **ABIPLUG** welding cable connectors from **ABICOR BINZEL** – designed for safe and effective current transfer in arc welding technology – guarantees maximum operating safety for the equipment and the user. Available as either panel socket / cable plug combination or as panel plug / cable socket combination.

The advantages:

- Safe and quick connection – highest twist resistance due to the revolutionary “square end-block-system” by ABICOR BINZEL
- High flash-over resistance – for maximum machine protection
- Easy mounting, optimal connection and excellent power transmission
- Compatible with all commercially available makes – can be built out of metal or plastic panels
- Corresponds to EN-standard EN 60 974-12 – the new EN-standard

The tough classics ...

The electrode holders are used for manual electrode welding. Manual electrode welding is one of the oldest and most proven arc welding operations that are still applied today. It stands out due to relatively low investment needs as well as its universal application possibilities. KURT HAUFE electrode holders "DE" are million-fold proven for decades and due to their extremely tough construction they are the optimum tool for the "outdoor professional" – amongst others in shipyards, pipeline construction and bridge building.

Besides the traditional version for connection via cable shoe the new "K"-series offers the possibility of direct crimp connection with the bare welding cable.

Special features:

- High-tensile, heat insulated handle
- Mechanical and thermal heavy-duty insulating material
- Safe electrode voltage in four chip flutes
- Big electrode and welding cable connection area

Gouging torch

K10 / K12 / K12 T / K16 / K16 T / K20

Reliable and safe ...

The original KURT HAUFÉ gouging torch is used for gouging, joint preparation, removing of pores and cracks, chamfering, cutting, surface treatment and hole piercing at all metals. They stand out due to their reliability and safety.

Special features:

- Oval, rugged, heat insulated handle
- Regulation of compressed air via rotary valve
- High air consumption
- High flex cable
- T-version with swivel joint
- Turnable nozzle suitable for round and flat electrodes

Gouging torch TEAM BINZEL®

G 3000 / G 4000

Rugged and easy to handle ...

The TEAM BINZEL® gouging torches G 3000 and G 4000 are safe and easy to handle. They are designed to be used for gouging, weld seam preparing, gouging out of blowholes and cracks, chamfering, cutting, surface resurfacing and keyhole cutting for all common materials.

Special features:

- Rugged and heat resistant handle
- Turnable nozzle suitable for round and flat electrodes
- High air consumption
- High flex cable
- Swivel joint

Gouging electrodes TEAM BINZEL®

ABIARC

Pure efficiency

TEAM BINZEL® gouging electrodes are made of artificial graphite and have a pure copper coating. The gouging electrodes are available in the variety of shapes and diameters to meet the needs of various applications.

Special features:

- Pure copper coated – good electric conductivity
- High density (made of artificial graphite) – high metal removal rate
- Less consumption of electrodes – cost reduction
- Constant quality – for a safe process
- High metal removal rate – effective process
- Extremely low burn back rate

ABIARC AL: for lower emissions and best results

These new carbon electrode types, built around a special aluminium core, ensure lower emissions of hazardous substances such as carbon monoxide, chromium, nickel, copper and iron. In addition, ABIARC AL electrodes also reduce general smoke emissions by up to 50 percent with excellent joint quality.

Coolant recirculators

CR 1000 / CR 1250

For a "cool" welding process ...

In high amperage applications with long welding cycles air-cooled torch systems can reach their limits. This can lead to malfunctions and unnecessary downtime.

The mobile cooling units CR 1000 and CR 1250 are the ideal complement system to equip a power source designed for air-cooled welding with a liquid cooled welding torch. For a permanently "cool" welding process. The devices are characterized by their high cooling performance in a compact design and easy handling.

With a few steps the integrated flow switch¹⁾ for the permanent monitoring of the complete cooling system can be connected to the machine-side connection of the welding torch. Therefore, operation without coolant is not possible and the welding torch as well as the cooling unit are optimally protected.

- High cooling performance in a compact design is ideal for mobile use
- International quick connectors for easy, time-saving installation
- Integrated flow switch for the permanent monitoring of the complete cooling system for protection of the welding torch and the cooling unit – connection set included in delivery
- Exposed tank with coolant level indicator for convenient filling and draining of the coolant
- Overheat protection for pump and motor – for a long life
- Low-weight and sturdy carrying handles for easy transport to the job location
- Splash-proof fuse, main switch and louvers

¹⁾ Operation is also possible without flow switch.

CR 1000

CR 1250

Technical data
