

Q Series

Instrumentation Quick Connectors

Applications

- Gauge Calibration
- Sampling System
- Portable Test Equipment
- Laboratory Equipment
- Gas Distribution
- Biopharmaceutical

Design and Engineering

- End Connection Size from 1/4" ~ 1/2" (6mm~12mm)
- Working pressure up to 3,000psig (206bar)
- Temperature up to 400°F (204°C) with Viton O-Ring
- Long Life cycle.

Operation of Hy-Lok Quick Connectors

- Use filters in front of quick connectors.
- Protect uncoupled body and stem with body and stem protectors or dust caps.
- Keep body and stem aligned when coupling and uncoupling.
- Couple and uncouple the quick connectors at room temperature.
- Couple and uncouple the quick connectors during system cleaning operation.
- Support hanging hoses or other equipments to prevent side load.
- Re-lubricate stem seal o-ring periodically.

Pressure-Temperature Ratings

Temperature °F (°C)	316 SS			Brass		
	Q1	Q2	Q3	Q1	Q2	Q3
Pressure Rating, psig(bar)						
Coupled						
70(20)	3000 (206)	1500 (103)	750 (52)	2000 (137)	1000 (69)	500 (34)
400 (204)	250 (17)					
Uncoupled and When Coupling and Uncoupling						
70 (20)	250 (17)					

Option of O-Ring Materials

Various O-ring materials, available whose temperature ratings are shown below.

Material	Temperature Rating
NBR	-10°F to 250°F (-23°C to 121°C)
Kalrez	-10°F to 600°F (-23°C to 315°C)
Neoprene	-40°F to 250°F (-40°C to 121°C)
Ethylene Propylene	-50°F to 300°F (-46°C to 149°C)

Features & Benefits

- Easy to use
- Minimum equipment shutdown.
- No tools required to make or break a connection.
- No probability of cross threading, galling, under or over-tightening.
- Interchangeable with same type of Swagelok, Parker, Hoke and TOMCO components.
- Single End shut-Off : This type of quick connector offers body shut-off valve function instead of stem shut-off.
- Double End shut-Off : This type of quick connector has same function with single End shut-off but, it has a small poppet valve in the stem. The pressure is automatically shut-off when the stem is removed from the body. It minimizes a spillage.

Spillage and Air Inclusion

Series	Spillage cm ³	Air Inclusion cm ³
Q1	0.3	0.3
Q2	1.0	1.0
Q3	3.0	3.0

Spillage - Spillage is the amount of system fluid that emit when a quick connector is uncoupled(DES0 only)

Air Inclusion - Air inclusion is the amount of air trapped between the body and stem that enter the system when a quick connect is coupled(DES0 only)

Maximum Flow Cv Rate at 70 °F(20 °C)

Series	Water Flow u.s. gal/min (L/min)
Q1	4 (15.1)
Q2	6 (22.7)
Q3	10 (37.8)

Installation Instruction

⚠ Warning :

System pressure must not exceed 250psig (17.2bar) at 70°F (20°C) when coupling and uncoupling the product. When uncoupling single-end shutoff quick-connectors, system pressure on stem side will be vent to atmosphere.

To couple :

Align stem and body.

Push the stem into the body.

Connections is complited when it "clicks"

To uncouple :

Pull the body sleeve toward the stem.

Caution :

- Do not rotate quick connectors while coupled.
- Do not insert a foreign objects into the uncoupled bodies or stems.
